file handling

```
In [1]:  # text files==== .txt

         # json file==== .json

         # excel    ====   .xlsx

         # excel ======  .csv(comma separated value)

         # pdf ======   .pdf

         # word ====     .doc and .docx

         # ================encoded=====================

         # xml   =====   .xml

         # parquet ==== .parquet

         # delta ===== .delta

         # tfrecords ==== .tfrecords (tf:tensor flow)

         # image ===== .jpg or .png or .jpeg

         # video ===== .Mp4

         # audio ==== .mp3

         # #syntax

         # # <folder_name>\<file_name>\.<text>
```

```
In [ ]:  In order to read the file

         1)- where is file located  : directory of the folder

         2)- what is file name  : in that folder so many files will be avaliable

         3)- what is the file extension   :  type of the file

         <folder_name>/<file_name>.<type>

         "C:\Users\Sruth\Downloads\mbox-short.txt"

         "C:\Users\Sruth\Downloads:  folder name

         mbox-short: file name

         .txt": #type of file
```

```
In [ ]:  "C:\Users\Sruth\Downloads\DT20245629196_Application.pdf"    example
```

```
In [ ]:  r"C:\Users\Sruth\Downloads\mbox-short.txt"     # at starting point add 'r'
```

```
In [ ]:  "C:\\Users\\Sruth\Downloads\\mbox-short.txt"      # or add \\ where there is sing
```

unicode error

- when ever we read the file it should be in quotes

- if we have single slash(/) only then we will get unicode error

- inoreder to aviod that we need to provide double slash or we an provide a letter 'r' without quotes at starting path

Read the file

```
In [ ]:  file_path=r"C:\Users\Sruth\Downloads\mbox-short.txt"
         file=open(file_path)
         print(file.read())
```

```
In [ ]:  file_path=r"C:\Users\Sruth\Downloads\mbox-short.txt"
         file=open(file_path,
                 mode='r',
                 encoding='utf-8-sig')
         print(file.read())
```

Method-2

- we can read the file without using folder also

- because every directory is different

- different laptops have different directory

- my directory : c:\users\sruth

- when ever we haand over to client

- for that we keep data file and python file in same location

```
In [ ]:  file_path="mbox-short.txt"
         file=open(file_path)
         print(file.read())
```

```
In [ ]:  print(file.read())
```

Method-3

using with

```
In [ ]:  file_path="mbox-short.txt"
         file=open(file_path)
         data=file.read()

         file=open(file_path)===>with open(file_path) as file
```

```python
In [12]: file_path="mbox-short.txt"
         with open(file_path) as file:
             data=file.read()
         print(data)
```

merge fix to SAK-10788 into site-manage 2.4.x branch:

Sakai Source Repository   #38024   Wed Nov 07 14:54:46 MST 2007   z
qian@umich.edu   Fix to SAK-10788: If a provided id in a couse site is fa
ke or doesn't provide any user information, Site Info appears to be like project
site with empty participant list

Watch for enrollments object being null and concatenate provider ids when there a
re more than one.

Enumerate

- Enumerate will give two values

- one is index value and another one is line

- Enumerate is similar to zip

```
In [6]: file_path="mbox-short.txt"
        file=open(file_path)
        for index,line in enumerate(file):
            print(index,line)
```

315 Modified:

316 site-manage/branches/sakai_2-4-x/site-manage-tool/tool/src/java/org/sakaiproject/site/tool/SiteAction.java

317 Log:

318 merge fix to SAK-10788 into site-manage 2.4.x branch:

319

320 Sakai Source Repository   #38024   Wed Nov 07 14:54:46 MST 2007   zqian@umich.edu   Fix to SAK-10788: If a provided id in a couse site is fake or doesn't provide any user information, Site Info appears to be like project site with empty participant list

321

322 Watch for enrollments object being null and concatenate provider ids when there are more than one.

323 Files Changed

324 MODIFY /site-manage/trunk/site-manage-tool/tool/src/java/org/sakaiproject/site/tool/SiteAction.java

Log:

merge fix to SAK-10788 into site-manage 2.4.x branch:

Sakai Source Repository   #38024   Wed Nov 07 14:54:46 MST 2007   zqian@umich.edu   Fix to SAK-10788: If a provided id in a couse site is fake or doesn't provide any user information, Site Info appears to be like project site with empty participant list

Watch for enrollments object being null and concatenate provider ids when there are more than one.

Log:
merge fix to SAK-10788 into site-manage 2.4.x branch:

Sakai Source Repository   #38024   Wed Nov 07 14:54:46 MST 2007   z
qian@umich.edu   Fix to SAK-10788: If a provided id in a couse site is fa
ke or doesn't provide any user information, Site Info appears to be like project
site with empty participant list

Watch for enrollments object being null and concatenate provider ids when there a

re more than one.

Log:
merge fix to SAK-10788 into site-manage 2.4.x branch:
Sakai Source Repository   #38024   Wed Nov 07 14:54:46 MST 2007   zqian@umich.edu   Fix to SAK-10788: If a provided id in a couse site is fake or doesn't provide any user information, Site Info appears to be like project site with empty participant list
Watch for enrollments object being null and concatenate provider ids when there are more than one.
